INTERDISCIPLINARY SPECIAL TEACHING PROJECTS

- 2013 Ecology and Entomology Mural/BioSciences – coordinated/consulted with illustration students and Department of Ecology, Entomology and Biological Sciences
- 2011-12 Coordinated the painting/replication of 30,000-year-old Grey Whale Mandible Casts. Worked with students, Dr. Scott Noakes of the UGA Center of Applied Isotope Studies, the Georgia Aquarium and the Smithsonian Institute to complete the painting of the cast. The painted cast is now on display at the Georgia Aquarium for 180,000 K12 students who visit the aquarium.
- 2012 Marine Science Mural/BioSciences – coordinated/consulted with illustration students and Department of Marine Sciences and Biological Sciences
- 1999 Human anatomy and Physiology Murals/BioSciences – coordinated with illustration students and Department of Human Anatomy and Physiology
- 2005 Georgia Museum of Natural History Mural

PROFESSIONAL ACTIVITY

My research is demonstrated through work as an illustrator and educator in the field of scientific and medical illustration. I provide biological and medical illustrations for biomedical professionals, educators, students, and patients. The material is created for print, projection, web based media, interactivity, animation and exhibit. I have separated

myself from a diverse and highly accomplished pool of illustrators as one of only around 300 certified medical illustrators in the world. My work as a medical illustrator of veterinary content is recognized as the standard for many applications. Furthermore, my 22 years of scholarship enables me to consult with universities and businesses in regards to learning objectives and educational curricula in the fields of Medical and Science Illustration.

a. Medical Illustration Consultation:

2008 Thomson Digital, Delhi, India, December 5-20
Thomson Digital is among the leading global service providers for end-to-end content processing and conversion for publishers worldwide. Thomson Digital is a digital pre-press corporation (composition, copyediting, text design, illustration, etc.) for some of the largest global publishing houses.

I was hired as a consultant by Thomson Digital to assess their ability to compete globally with their medical illustration products. On February 3, 2009 I provided them with a written assessment document.

b. Co-authored, Illustrated and Designed an Interactive Educational Program

1998-2010 The Virtual Roach, authors E.N. Wright and Dr. Joseph V. McHugh (Department of Entomology), have developed an instructional and interactive program on the subject of insect anatomy entitled "The Virtual Roach". This system was designed, programmed and illustrated by E.N. Wright. It is comprised of an interactive program carrying information in the form of a glossary of terms and extensive archives of newly generated images from scanning electron microscopy, photomacrography and scientific illustration. The system interface links the terms and images in a hierarchical manner permitting the user to make a self-guided dissection of the American Cockroach (*Periplaneta americana*). Each layer of the virtual dissection presents a new image and new potential avenues to investigate. At any stage, structures can be selected for alternate views, closer examination, removal, or definition.

The Virtual Roach was originally funded in 1998 through a \$79,736, grant from the Department of Agriculture Higher Education Challenge Grants Program, United States Department of Agriculture, E.N. Wright and J.V. McHugh

2009-2014 The Virtual Roach was '**Contracted for Lease**' by Orkin, Inc. for a fifth year, with an option for 3 concurrent years, where by the Module will be hosted on www.Orkin.com.

c. Journal Articles Authored:

2002 "The Virtual Roach, an instructional CD-ROM on Insect Anatomy," The Guild of Natural Science Illustrators Newsletter, Smithsonian Institute 7 (2002) September, 1-9

2002 "The Challenges of Education in Scientific Illustration," The Guild of Natural Science Illustrators Newsletter, Smithsonian Institute 7 (2002) September, 9-11

RECOGNITION AND OUTSTANDING ACHIEVEMENTS

- 2013, '12 , '11 Nominated as the Georgia Regents University, Allied Health Sciences Distinguished Alumni for 2011, 2012 and 2013
- 2011 University of Georgia, Franklin College of Arts and Sciences nominee for the UGA Josiah Meigs Distinguished Teaching Professorship Award.
- 2008 "Fab 40", Medical College of Georgia, School of Allied Health Sciences 40th Anniversary, Augusta Georgia (Award recognizing me as one of the top four distinguished graduates in Medical Illustration over the past 40 years)
- 2007 AMI Fellow, The Association of Medical Illustrators recognizes members with outstanding service records within the organization
- 1993-2013 Certified Medical Illustrator (there are currently around 250 certified medical illustrators in the world. Certification is a program endorsed by the Association of Medical Illustrators to encourage lifelong learning and to measure professional competency. Similar to specialty certification for physicians, the competency evaluation consists of a written test and a practicum. The Board of Certification of Medical Illustrators (BCMI) is an independent body that administers the voluntary certification program). Certification must be renewed every 5 years.
